

The Emergence program

Objective: to extend CAP 20-25's concept of excellence to the entire Auvergne site in order to address new scientific issues and problems

For this, the Emergence program supports high added-value projects allowing the realization of exploratory projects with a high level of risk, likely to lead to potentially decisive discoveries.

To reach this goal, the program steering committee has defined a multi-year strategy based on one call for projects per year.

STEERING COMMITTEE

Chairman: Pierre Henrard

V. Breton

H. Cochard

C. Dubray

A. Guillin

E. Hugo

J.-P. Luis

G. Mailhot

Y. Mard

Y. Michelin

J.-M. Nedelec
