

Postdoctoral research fellowship program on human mobility and health, Clermont-Ferrand (France)

The International Research Center 3 - IRC3 opens three postdoctoral positions in “human mobility and health” related fields. See the link for more information ([Objectives IRC3](#)).

As part of the iSITE CAP20-25 initiative ([IRC3 2017-2022](#)), the successful candidates will benefit from a **EUR 300k package (EUR 100k/year for 3 years)**. This package includes 3-years post-doc salary as well as running costs for the proposed project. The project should fit with the research themes of one of the host laboratories: [List of Research Units](#). Please contact them for further details. A complementary budget could be allocated by the host laboratory.

Candidates must have completed at least 2 years of postdoctoral training in a country different from that of their PhD graduation. Candidates currently holding a post-doctoral position in Clermont-Ferrand are not eligible. Candidates with a strong postdoctoral experience are encouraged to apply.

Applications should include a cv, a short description of achievements and a record of self-financing, accompanied by the proposed research program (5 pages maximum) and contact details for 3 professional references. An application form is available [here](#). An acceptance letter from the host laboratory is required. Early career or established scientists are welcome to apply.

The IRC3 will assist successful candidates to compete for a permanent position in a French research institution (CNRS, INSERM, INRAE) as well as for external funding (competitive grants).

The final deadline for applications is **June 30, 2023**.

Start date: January 2024

Shortlisted candidates will be invited for interview with a scientific committee.

Please send your application as a single PDF file of approximately 6-10 pages named LASTNAME_2023.pdf to cir3.cap2025@uca.fr

Any enquiries concerning this call should also be sent to this address.
